

```
class client {  
    public String name;  
    public int token;  
    void enter_name (String client_name) {  
        name = client_name;  
    }  
}
```

```
String client_name () {  
    return name;  
}
```

```
int client_token () {  
    return token;  
}
```

```
public class time_token {  
    public static void main (String args[]) {  
        client clientt1 = new client;  
        clientt1.enter_name ("Vishal");  
        Random rand = new Random();  
        for (int i = 0; i < 9; i++)  
            int rand_no = rand.nextInt(100);  
        clientt1.token = rand_no;  
        printf ("token number " + i + 1 + " : " + clientt1.client_token);  
    }  
}
```
